***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 35, drawn to navigating a waterway, classified in class 701, subclass 207.
- II. Claims 36 - 40, drawn to aiding a tow in traversing a lock and a dam, classified in class 701, subclass 201.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because navigating a waterway does not necessarily aiding a tow in traversing a lock and a dam. The subcombination has separate utility such as determining travel data, using software, based upon the start point and destination point.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

***Telephonic Communication***

A telephone call was made to Mr. Dennis Carleton on 6/5/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

***Joint Inventorship***

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
